Looking for a Digital Music
Distribution Platform?

Companies offering all kinds of
services to artists - ranging from
traditional record labels to online
promotion services and artists
management tools, rely on **musicxip**
to deliver their music to the world's
leading online digital music services.

Our **white label solution** allows you
to set up a fully functioning,
customized Digital Distribution service
on your own domain without any
effort.

You can also leverage our **API** to
build Distribution Services into your
existing website or platform.

musicxip offers multiple methods of
integrating distribution services and
extending the platform's functionality.

Musicxip. The way your music connects.

musicxip is a cloud-based
music distribution platform
with a customizable interface.

Fast, reliable and convenient.

Let our technology do the work for you

Connecting your music business to the leading digital music services.

Know-how.

Since 2004, La Cúpula Music, creator of the musicxip platform, has been involved in research and development of flexible, scaleable and affordable digital music distribution solutions. We have seen the digital music market develop and know what the main pitfalls are. We can help you set up a fully operational digital distribution service under your own brand, at a very affordable rate.

Easy to get started.

musicxip is ready to use as soon as we activate your account. You don't need to worry about servers or software updates. And because it's web-based, you and your artists or labels can access musicxip anywhere, anytime, ready to start to generate digital revenue - worldwide.

Easy access to stores.

From the outset, musicxip is already connected to the world's leading digital music services, including iTunes®, Spotify®, Beatport®, AmazonMP3® and Grooveshark®.

Depending on your needs we can integrate the stores or services in which you want us to distribute your catalogue.

You can use our existing contracts with these services, or have musicxip setup to deliver your catalogue to the digital music services using your own contracts.

Easy to scale.

Activate as many artist or label accounts as you want, or have artists and labels create their own accounts on the system. musicxip is being used by music businesses that are servicing thousands of artists each day.

Easy to engage artists.

Connect your artists with a branded distribution service from where they already connect to you, be it your website, web-based application or through a completely new service.

Easy to customize.

Using our **white label solution**, design your distribution site to reflect your brand. Alternatively, with our **API** you can integrate distribution services into your existing site, application or platform to ensure a seamless user experience for your artists.

flexible solutions for your distribution needs

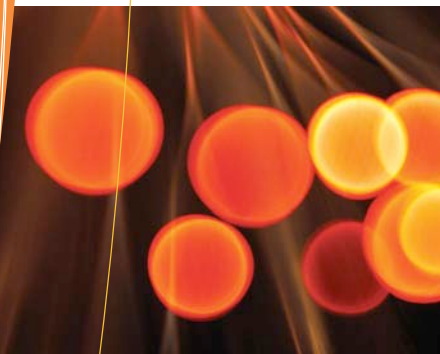

musicxip provides a total end-to-end solution.

Our values.

Transparency, It's our job. We created musicxip to provide full transparency throughout the entire value chain to artists and labels.

Independence. Established by artists for artists, our company is dedicated to create technology that allows independent artists and labels develop their careers in the digital realm.

Proximity, musicxip is completely developed in-house and designed to meet the needs of artists, labels, and digital music services. Our team is ready to advise you personally on technical, business, strategic or legal issues. Our white-label approach allows artists and labels worldwide to access our services through local partners they trust.

Key Features

Catalogue management.

musicxip allows you and your artists or labels to create tracks, combine tracks into releases, and send them to the digital music services of choice. The revolutionary track based architecture allows for fast and simple creation of Singles, EPs, Albums and Compilations on the basis of your existing catalogue.

Encoding.

musicxip takes care of all the encoding work that is needed in order for the music to be published in the digital music services. It also takes care of content updates and takedowns, regardless of the format required by each digital music service.

musicxip is DDEX compliant, ready to communicate with all services that use this emerging format.

Digital Distribution.

Balanced servers and the use of the Amazon Cloud make deliveries to the digital music services fast and reliable. You can distribute one track or thousands at a time, musicxip takes care of it, with a few clicks.

Royalty Reporting.

musicxip not only sends your music to the digital music services; it also ingests and processes the sales files received from these services. This gives each artist or label a timely, transparent and precise overview of royalties received in his account.

Flexible pricing.

With flexible, volume-based rates, musicxip can offer you options that allow you to develop your business and access digital markets cost-effectively.

Self service.

Artists can create their own account on your branded musicxip distribution service and take care of uploads, distribution, updates, takedowns and royalty outpayments via the interface, reducing time and costs of managing these processes for your organization while providing an easy-to-use service.

Multilingual.

musicxip is prepared to work with an English, Spanish or French interface, but the system can be translated in any language you wish, in order to be able to optimally serve emerging digital markets.

Ask us.

Feel free to contact us at sales@musicxip.com to find out how you can connect your music. We'll be more than happy to set up a call and discuss the possibilities.

Custom solutions

Apart from our white label and API integration, we can also develop custom solutions for any business that needs to receive music from multiple artists and manage or deliver this music digitally; for example advertising campaigns, contests, music ingestion systems...

Cloud based

musicxip is completely cloud based. Stability, service levels and scalability are backed by Amazon Web Services .

Support

Our support centre and extensive knowledge base are at your service.

On your request, we can also implement and run a branded support centre for your distribution services.
